

I have commented recently, but I again want to register my concern that the radio media in this broadcast is controlled by Clearchannel, and I feel that the listeners are not being serviced by this entity. We have to listen to the same broadcast team on different call letters and the material presented does not reflect the community values. I find that I must always change to a fm station to receive a less polluted adaptation of the current events. Our nation was built on the ability of any person to start a business. I feel that Clear Channel prohibits this right on the individual.

Thanks
